Training Programme for Leaders

Learning is a continuous process in our organisation. Members of all our self-help groups are encouraged to improve the quality of their lives by constantly updating themselves. A training programme was recently organised for the leaders of our self-help groups at Jayraj Hall, Kodaikanal. The leaders were provided with tips to help them manage their SHGs not only as efficient micro-finance groups but also groups that understand local issues and take steps to help solve them. The groups were given inputs about various Government programmes in Kodaikanal and how our groups can help in them. Around 300 leaders attended the training programme.

Encouraging Mothers of Girl Babies

Ms Abirami of Coimbatore-based 'Doctor's Network' hands over a stroller to a proud mother. The Doctor's Network is involved in helping economically disadvantaged patients in the rural areas get access to medical advice from reputed hospitals.

In a move to prevent female infanticide, INS encourages new mothers with a gift for the baby girl. A welfare programme was recently held at Palani where mothers of girl babies received a traditional wooden stroller and a citation to make them proud for giving birth to a girl. The strollers were made by women in our own carpentry unit.
